SUMMER VARIETIES

- ✓ **Lodi** — Improved strain of Yellow Transparent; fruit much larger; bears earlier.
- ✓ ***Yellow Transparent** — Medium, pale yellow, fine flavor, dessert and cooking.
- ✓ **Red McIntosh** — Hardy, red skin, medium size, extra fine flavor.
- Beacon** — Extremely hardy, medium size apple. Striped red, fairly tart in flavor. Also used for a hardy frame to graft other varieties on.

IMPERIAL DOUBLE RED DELICIOUS

Plant Patent No. 1805

New Super Sport Member
of the Red Delicious Family

The Imperial Double Red Delicious is a full tree sport with over-all red blush color and without stripes. Several days before normal harvest, the Imperial reaches practically 100% extra fancy coloration . . . and holds on the tree until full maturity without becoming "blackish".

Discovered on one of the Elon J. Gilbert Orchards near Yakima several years ago, the Imperial tree has consistently produced good crops of well-sized, beautifully colored apples. It is now about 15 years old and is of normal size. Imperial keeping quality has been termed excellent. Very good flavor.

"Choice Yakima Valley Nursery Stock"

FALL VARIETIES

- *Gravenstein—Large, striped, tender, juicy, high flavor. One of the best varieties west of the Cascades.
- *Red Gravenstein—Solid red strain of Gravenstein.

WINTER VARIETIES

- *Blackjon (T. M. Reg.)—A bud sport or mutation of Jonathan, earlier and more color, deep red.
- *King—Very large, yellow, splashed with crimson, excellent dessert, good baker. One of the best varieties west of the Cascades.

McIntosh — Hardy, medium, fine flavor. For high altitude.

- *Red Delicious—Double red type of Delicious, very good quality and flavor (Starking Strain).

OKANOMA RED DELICIOUS — (Spurred). Same quality and color as the Red Delicious. The tree habit is semi-dwarf. Very prolific bearer, apples average slightly smaller than Red Delicious. Tree requires minimum amount of pruning.

NOTE. Prices 10 cents higher per tree.

- Red Rome — Solid red strain of the old favorite Rome Beauty. Large size and very good color. This is one of the best Red Rome strains being propagated today.

- Red Winesap — Solid red strain of the Winesap. We have one of the best strains of Red Winesap yet produced—long type.

Winesap — Dark red, sub-acid, best market, good keeper.

- *Winter Banana—Large, clear waxy yellow with blush, tart flavor, good cooking.

Yellow Newtown (Pippin)—One of the best keepers, golden yellow, good quality.

Yellow Delicious — Excellent dessert and cooking apple with a wonderful flavor. Rich golden color, resembles the Delicious in shape of fruit. Very good pollenizer.

Wellspur Red Delicious (Trade Mark Registered)

Wellspur Red Delicious is an early coloring sport of Delicious produced on a spur-type tree.

Spur type trees are semi-dwarf trees. They are about 2/3 to 3/4 size, depending on the quality of soil they are planted in.

Wellspur Red Delicious was discovered in the Azwell orchard of Wells & Wade Fruit Company of Wenatchee, Washington, in the early 1950's. It has proven its early coloring characteristics and spur type of growth in succeeding generations.

Riland — Earliest commercial Apricot, beautiful color, excellent early shipper.

Blenril — New, medium size, early apricot. Cross between Riland and Blenheim.

Earliril — Another new apricot. Cross between Riland and Blenheim. Medium size, early.

Chinese — This is one of the new Apricots that shows promise as an early marketing variety. Medium size, yellow, good quality.

Perfection — One of the finest of the newer varieties. Moderately early, very large fruit. Flesh is yellow-orange.

Wenatchee Moorpark — Large, heavy bearer, good color, the leading market Apricot.

Blenheim — Medium size, oval, deep yellow. Good canner productive, excellent quality.

Tilton — Hardy, medium rich, juicy, canner.

Royal — Very similar to Blenheim. Ripens approximately the same time; good shipping and canning Apricot; good all-purpose variety.

NECTARINES

Goldmine — Large, red and yellow fruits, flesh juicy, white. Excellent in flavor and quality. Produces abundantly.

PEACHES

Cardinal — Very early. Ripens about 4 days earlier than Redhaven. Red blush, semi cling.

Dixie Red — (Semi Cling) New early Peach with a very good red color, ripens about Redhaven time. Very promising fresh fruit variety.

Sunhaven — This new peach ripens a few days before Red Haven and about 4½ weeks before Elberta. Medium large fruit that handles unusually well for an early maturing variety.

PEACHES (Continued)

- **Redhaven**—The best new early Peach we have seen in a good many years; ripens about 30 days ahead of Elberta, golden flesh, fine grained, highly flavored. It colors very early to an almost solid brilliant red; hardy; heavy bearer.
- ***Golden Jubilee (Freestone)**—Is similar to Elberta in tree habit and form and appearance of fruit. Good bearer. Hardy. Excellent canning peach. Three weeks before Elberta.
- ***Rochester**—Very hardy, thrifty grower. Medium size, deep yellow and red, excellent quality. Especially good west of the Cascade mountains. Three weeks before Elberta.
- **Redglobe** — Introduced in 1954 by the U. S. Department of Agriculture. Redglobe combines the attractive red exterior color of the early varieties with an approach to the firmness and size of J. H. Hale. The flesh is firm and medium fine in texture.
- ***Halehaven (Freestone)**—Eighteen days before Elberta. Resembles Hale in appearance, colors highly on the tree several days before it is ripe. Hardy, heavy bearer, fine flavor. Good shipper.
- ***Veteran**—One of the new Peaches that is particularly adapted to the climate west of the Cascades. Fruit very uniform in size, yellow flesh; a very high quality Peach for both canning and eating.
- **Earlihale** — About two weeks earlier than J. H. Hale and has the same solid blush that the J. H. Hale has. Very good shipper and is self-fruitful like the J. H. Hale, but has more tree vigor and hardiness.
- **Slappy (Freestone)**—Yellow, high quality, hardy, excellent canning Peach.
- **Early Elberta (Freestone)**—Large, golden yellow, excellent quality, good shipper, and good canner.
- **Richhaven** — Fruits are large, nearly round and uniform in size and shape. Bright golden overlaid with a large bright red blush on the area exposed to the sun with stripes of red and gold on opposite side. Thick, tough skin adds to the handling and shipping quality of the fruit.
- **Elberta (Freestone)**—Best market and canning Peach ever produced.
- **J. H. Hale (Freestone)**—Surpasses Elberta in size and color. Ranks next to Elberta as a commercial Peach.
- **Gold Medal (Freestone)** — Very good quality. Flesh deep yellow, firm and sweet, large size. Golden yellow. Desert, canning, market Peach. Hardy. Ripens just after Elberta. Very productive.
- **Ambergem Cling** — Very good cling peach that was recommended to us as one of the better clings for our climate. Amber colored flesh. Very good for pickling.

PLUMS

- **Beauty**—Japanese Plum. Early, medium size, red, good quality, used to pollinize Santa Rosa.
- **Santa Rosa**—Probably the best of all the Japanese Plums. Large reddish to purple. Good shipper, good quality and good bearer.
- **Howard Miracle** (Plant Patent No. 721) Large sized, heart shaped plum. Has golden flesh with a very sweet flavor when ripe. Skin turns red when ripe. Very heavy bearer when cross pollinized with Satsuma.
(Note prices are 25¢ each higher)
- **Wild Plum**—Native of Oregon. Selected strain, very hardy, prolific bearer, high quality Plum to eat out of hand and excellent for marmalade and butter.
- **Peach**—Light red skin, large, round, good for home garden.
- **Satsuma**—Japanese Plum. Blood red flesh, pleasant, juicy.
- ***Yellow Egg**—Large, egg-shaped, yellow, good canner.
- ***Blue Damson**—Small, roundish oval, dark purple, fine canner. Preserves.
- **Green Gage**—Fruit large, greenish yellow, flavor excellent.

PRUNES

- ***Early Italian** (Richard's strain)—Slightly larger and sweeter than the Italian Prune. Two weeks earlier. Good commercial variety. A bud sport of the Italian.
- **Weatherspoon**—Seedling of the Italian, ripens same time as Richard's strain of Early Italian, large, high quality, heavy bearer when pollinized with Richard's strain of Early Italian.
- ***French**—Medium, fine texture, sweet, drying.
- ***Italian**—Good quality, medium size, purplish black color. The leading variety for market and home use.
- **Stanley** — Fruit large size, dark blue. Flesh greenish yellow, juicy. Fine grained, tender, firm, sweet and pleasant. Good quality, mid-season.
- **President**—Latest ripening Prune. Heavy bearer, high in quality and large fruit. Does not need pollinizer.

- ***Bartlett**—Large clear yellow, juicy, buttery, dessert, cooking and canning.
- ***Flemish Beauty**—Large, white flesh. Excellent pollinizer.

68

PEARS (Continued)

Packham Triumph — A Bartlett type pear, ripens about a week later than Bartlett and is an excellent keeper. Also used as a pollenizer for Bartlett. Fruit tends to be rough on young trees, but gets smoother on older trees.

***B. d'Anjou**—A firm Pear, rather large, flesh yellowish-white, rich buttery flavor, good keeper. One of the leading commercial Pears.

***Winter Nelis** — Delicious, sweet, very fine, good keeper.

Patented Roses

GRANDIFLORA ROSES

The new Grandiflora class consists of varieties relatively tall in growth, free flowering, often with many flowers in clusters, but with individual stems long enough for cutting. The flower size, though not necessarily as large as hybrid teas is larger than the average floribunda with hybrid tea bud and flower form.

BUCCANEER—(Pat. No. 1119.) Bright buttercup yellow
Long tapering buds and large double flowers. Tall upright, vigorous Price, \$2.50 each; 3 for 6.60

CARROUSEL (Pat. No. 1066) Bright sunfast red flowers of fine form that last well when cut. Profuse, tall vigorous. Price, \$2.00 each; 3 for \$5.25

EL CAPITAN (Pat. No. 1769) Big handsome plant producing hundreds of perfect flowers on long stems. The color is a gleaming cherry red. Price, \$2.75 each; 3 for \$7.20

GOVERNOR ROSELLINI, (Pat. No. 1873) Rose red buds and flowers of hybrid tea quality. Warm fruity fragrance, vigorous, upright growth, abundant bloom. Price, \$2.75 each; 3 for \$7.20

MONTEZUMA — (Patent No. 1383) Brilliant orange red. Very beautiful shapely buds and big showy long lasting blooms on a big husky plant. Price, \$2.75 each; 3 for \$7.20

PINK PARFAIT (Pat. No. 1904) All America for 1961. Great quantities of buds and high centered. Blooms in delicate pink shades. Vigorous and easy to grow. Price, \$3.50 each; 3 for \$9.20

QUEEN ELIZABETH—(Patent No. 1259.) All America for 1955. Lovely soft carmine rose and dawn pink. Fragrant flowers with long, almost thornless stems. Good disease resistant foliage. Price, \$2.50 each; 3 for \$6.60

STAR FIRE (Pat. No. 1742)—All-America Grandiflora for 1959. The unusual currant red color is sun-fast — will never fade. Its brilliant urn-shaped buds open into distinctive perfectly contoured flowers. Foliage is bronzy-green, leaves glossy, holly-like in composition and shape. Long cutting stems, lasts long time cut, often lasts 8 to 12 days on bush. Price, \$3.00 each; 3 for \$7.95

PLANTING INSTRUCTIONS

GENERAL

DO NOT use commercial fertilizer or barn yard manure in such a manner that it comes in contact with roots.

DO NOT expose roots to air.

It is beneficial to the trees or plants to immerse the roots in water before planting. Many failures of newly transplanted stock are due to lack of proper pruning. Follow pruning instructions given for each class of nursery stock. The holes for planting must be large enough to receive the roots freely without bending them from their natural position. All broken or mutilated portions of the roots should be cut off so as to leave the ends smooth. All trees and plants should be planted two inches deeper than they stood in the nursery row; pack the soil firmly about the roots by tamping with the feet, being careful not to bark or break the roots. Leave three inches of the surface soil loose to serve as a mulch. If the ground is very dry, apply one or two pails of water before this soil mulch is in place and after the water has soaked away it can then be placed over the moist soil.

FRUIT TREES. Follow general planting instructions.

Branched. Select three or four of the best side branches, well-spaced so as to balance the tree. Prune these back one-third and cut off all other branches close to the trunk.

Whips (without branches). Trees having no side branches, cut off top just above a bud 24 to 36 inches from the ground.

SHADE TREES. Follow general planting instructions. Shade trees having a heavy top, at least one-third of the top area should be removed. Prune to avoid crowding the branches. Cut out some of the smaller branches and shorten back the side branches, but do not cut off the leader or main stem.

ROSES. Follow general planting instructions. Be sure that the bud is two inches below the ground. If the soil is dry, it is well to plant the rose solidly, then wet thoroughly and after the water has soaked away, throw up a small mound of earth five or six inches high around the plant. Then cut off the branches one inch above the mound, leaving it this way for ten days or two weeks, or until the buds start and show a desire to grow, when the dirt mound can be raked down. Roses handled in this manner seldom fail to make a good start and a very satisfactory growth.

RASPBERRIES, BLACKBERRIES, YOUNG-BERRIES, LOGANBERRIES, BOYSENBERRIES and DEWBERRIES. Follow general planting

Planting Instructions

instructions. Cut back tops within six inches of the ground.

BLUEBERRIES, CURRANTS and GOOSE-BERRIES. Follow general planting instructions. These plants require no pruning until shoots begin to crowd, after several years.

STRAWBERRIES. Dip roots in water and plant immediately then irrigate or pour a pint of water around each plant. Plants are easier to handle if roots are sheared off a little, leaving them about four inches long.

GRAPE VINES. Follow general planting instructions. Prune back to one cane and cut this cane back to two or three buds.

PRIVET for hedges. Follow general planting instructions. Prune back to six to ten inches above the ground.

EVERGREENS and BROADLEAF EVERGREENS. These plants are dug with a ball of earth and wrapped in burlap. Dig the hole about six inches wider than necessary to receive the ball of earth; however they should not be planted any deeper than they stood in the nursery. Half fill the hole with good rich top-soil. Pour in enough water to fill the hole so that it will wash the dirt solidly around the base of the ball. Straighten the plant up; cut the wrapping around the top of the ball, and fill in remainder of hole with dry soil, tamping down firmly. Leave a basin-like depression around the plant to facilitate absorption of water. Do not make a hill, as it compels the water to flow away from the plant. All evergreen plants need a mulch, which prevents evaporation of water in the soil. Peat moss is an excellent material for this purpose.

NOTE !

Our many years of experience in the nursery business enable us to give you valuable and practical information and service in selecting, planting and caring for plantings. It has always been our aim to furnish a superior quality of the best varieties of nursery stock and to maintain policies that make our customers of today our customers of tomorrow.

CLAIMS

Claims for any cause must be made promptly on receipt of shipment. Any stock rejected must be reported immediately and held for advice from us as to disposition, but in no case should it be returned to us without authorization. We will cheerfully allow credit for proven unsatisfactory stock, but will not entertain claims after stock has been accepted.
